

- ø3mm LED
- 15kV ESD protection to front panel
- Special assemblies on request

The LED-element is a further development of 26-03. With nearly no change of the outer dimensions, an additional cover frontside for 15kV ESD protection has been added. It is possible to replace type 26-03 without any change of the PCB layout.

Electrical Data

ESD protection to front	≤15 kV
-------------------------	--------

Mechanical Data

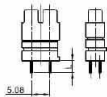

Fixation mode	THT
LED diameter	3 mm
Pitch of solderpins	2,54 mm
Serial pitch	5,08 mm
Resistance against cleaning fluids	yes
Operating temperature	see LED-Quality in Technical information

Material

Insulation material	PA6.6 GF25
Flammability	UL94V0

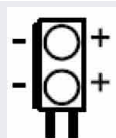

Configuration

Type	both levels equipped
LED Colour	bottom level green / top level red
LED-quality level	Low Current II
Length of solderpins	

straight pins L=3.2mm

Polarity

Standard
